

PRODUCT FEATURED

Mobi-Level Sensor

PRODUCT OVERVIEW

The Mobi-Level sensor is a robust, low power, easy-to-install tank/reservoir sensor which allows you to monitor water levels in any tank/reservoir in any location. With an easy 30-minute installation, you will be able to monitor your tank water levels through the Mobi-Water dashboard, mobile app or SMS notifications.

FEATURES

- Can be used on all plastic, concrete and Steel water tanks.
- Available in solar-powered / grid-powered options.
- Uses ultrasonic sensor technology with 99% measurement accuracy.
- 5 / 10 min consistent uploading frequency.

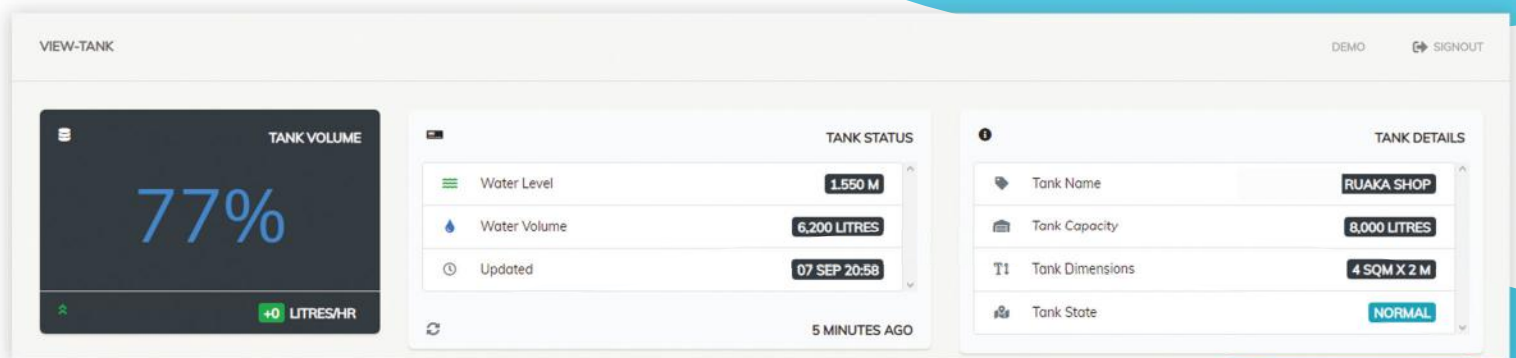

AREAS OF APPLICATION

- Factory / industrial tank / reservoir monitoring.
- Commercial properties; office blocks, malls,
- Hotels & restaurants.
- Water utility distribution reservoir tank monitoring
- Water projects / kiosk tank monitoring.

TECHNICAL SPECIFICATIONS

| | |
|------------------------|-----------------------------|
| Power Supply | 5-12V , 0.2A |
| Battery Capacity, Type | 4400mAh, 18650 Rechargeable |
| Communication Module | GSM / GPRS |
| Upload Interval | 5/10/ 20 Min. Frequency |
| Sensor Type | Ultrasonic Sensor |
| Operating Temperature | 5 - 65°C |
| Case Dimensions | 120 * 81 * 65mm |

Mobi-Level Sensor Dashboard

FEATURES

- Water tank level analysis and reporting.
- Track water tank state, capacity and location
- Get notifications for low/high consumption level thresholds.
- Get litre per hour consumption updates.
- Predict water tank level status.
- This information is also accessible via SMS.
